Death of Katie McCrimmon Love Shock to Whole of Alberta

Daughter of Alberta Set High Standard for Youth of Her Native Province

Alberta suffered a real loss Tuesday when Mrs. Russell Love, formerly, Katie McCrimmon, was laid to rest. Born of pioneer parents in Calgary, on February 23rd, 1895, later accompanying her parents to Edmonton in 1902, she was essentially an Albertan. Her school days were spent at McKay Avenue school, the Edmonton high school on College Ave., and Victoria High School. Later she was graduated from the University of Alberta, class '17. She was appointed girls work secretary for the Edmonton district, which post she occupied with greatest benefit to all with whom she came in contact. Resigning in 1923 she became a student at the Edmonton Normal, later filling a position on the staff of Queen's Avenue school. Social service again appealed to her generous nature and she was appointed provincial girls work secretary.

On November 2nd, 1925, Miss McCrimmon became the wife of Mr. R. Love, B.A., M.L.A. for the Wainwright constituency, a fellow student of high school and university days. They were married at the First Presbyterian church, Edmonton, at which ceremony Dr. McQueen, officiated, and many citizens of Edmonton will recall the ovation accorded the bride by the C.G.I.T. girls as she left the church. In their effort to wish their beloved Katie joy and happiness they gave full vent to their feelings. As the carriage left the curb, hundreds of young girls in their C. G. I. T. uniforms, lined up, and sang their campfire song, "Marinka, We Love You."

President of Students Union
The esteem in which she was held was evidenced when she was elected a permanent representative of the Victoria Alumni association for the years previous to 1921. A further appreciation of her worth was shown when she was elected honorary president of the same association. Mrs. Love's capabilities were recognised even in undergraduate days for the signal honor that was then accorded her by her election to the presidency of the Students' union, the only woman ever elected to that position. Her connection to the University was renewed by her recent appointment as the first woman member of the Senate of the University.

After her marriage she lived with her husband at Irma, but owing to her husband's business connections requiring his time in Edmonton they moved to the City.

Mrs. Love was for many years a member of the First Presbyterian church, Edmonton, but after moving to the City she became a member of Robertson United church. Since the birth of her first daughter, Joan, her life has been largely devoted to her home and family. Mrs. Love had been in hospital only a short time and arrangements had been made for her to return home, to which she was looking forward with great joy. On Thursday last she expressed her happiness and seemed a picture of health, but a relapse occurred early Friday morning and death came with startling suddenness.

Expressions of sympathy have been received from all parts of the province and the front of the church was piled high with over a hundred floral tributes.

Beautiful floral tributes were received from: Husband and daughters; the family; Gertie; Audrey, Doreen and Doris; Gordon and Maude; Esther; Heck and Myrtle; Lucille and Wilkie; Mr. and Mrs. E. T. Love; Bessie Porteous and Grace Cruikshank; Mr. and Mrs. J. A. Cooper; Dr. and Mrs. M. A. McIntyre; Mr. and Mrs. J. C. Calhoun; Mr. and Mrs. G. A. Hunt; Mr. and Mrs. J. D. O. Mothersill; Canadian Girls in Training, Westmount United Church; Mr. and Mrs. F. M. Hill and family; Mr. and Mrs. Thomas Watt; Noon class; Students' University, University of Alberta; Mr. D. R. McComb and Kathryn; Mr. and Mrs. R. A. Anderson; Provincial Girls' Work Board of Alberta; Mr. and Mrs. A. Ottewill; Mrs. Mickelberry and Hollis; Miss Jessie M. Moses; Mr. and Mrs. W. G. Slocumbe; Mr. and Mrs. T. H. Wells; Mr. E. E. Nixon; Charles and

FOR SALE—Seed and Feed Oats. Seed 60c cleaned; feed 45c. Germinated 94 per cent.—G. A. Arnold, Irma, Alta.

CHURCH NOTICES AND ACTIVITIES

UNITED CHURCH NOTICES
The services next Sunday will be at Alma Mater at 3 p.m. and at Irma at 7.30 p.m.

There are arrangements being made for some very important meetings in the near future. Rev. R. W. Hibbert of the Religious Education Council of Alberta is expected to make a visit around the week end of March 23rd if suitable arrangements can be made in conjunction with the Presbytery. The Rev. Dr. Dobson of the Board of Evangelism and Social Service is also likely to visit us toward the end of the month or early in April. Should these plans materialize, it will mean a great uplift for us. No one should miss the opportunity of hearing these men, and we therefore make this tentative announcement.

Additional Church Notes
Service.—Sermon topic for Sunday March 23rd, "Jesus and the People" A Lantern Lecture "Around the Pacific Coast" will be given in the church sometime in the week following March 23rd. This is in connection with our mission work out there.

Since the above announcements were prepared for the press, definite arrangements have been made for the visit of Rev. R. W. Hibbert, M.A., B.D., Secretary of the Religious Education Council. He will come here on Thursday, March 20th. He will meet the teachers and officers of the Sunday School in a round-table conference at 4 p.m. in the church, and address a public meeting in the church at 8 p.m. This will take the form of a lantern lecture entitled "From Prairie to Palms". See handbills.

Pioneer Passes.

NEIL J. MACGILLIS PASSES.
On Tuesday, March 11th, Mr. Neil J. MacGillis, one of the oldest residents in the Irma district passed away at the Viking hospital at the age of 71 years. The late Mr. MacGillis took up his homestead when the Battle River bridge was started east of Irma and with the exception of a few seasons, while he was working at the carpenter trade in the city he has resided on it ever since. During these years he made a number of friends among his neighbors as far as could be ascertained he had no relatives with whom he had been corresponding. His remains were shipped to Irma and Rev. Mr. Geeson preached a very appropriate sermon Thursday afternoon after which the body was interred in the Irma cemetery. The following old timers and neighbors acted as pallbearers: Mr. C. T. Hill, Mr. McMillan, Mr. S. C. Miles, Mr. O. Enger, Mr. F. W. Higginson and Mr. G. A. Tripp.

NOTICE

Owing to the editor being away most of last week, we were unable to get the Times out on time. We are combining the issue for the 14th with the issue of the 21st and trust our readers will excuse the unavoidable delay. The next issue will be on March 28th after which we hope to appear on time.

The Times Official Paper for Kinsella Municipal District

The Times has received the contract to supply the ratemakers of the Municipality of Kinsella with a weekly paper. In order to accommodate the additional subscribers without ordering too many extra papers we will be compelled to discontinue a number of our old subscribers who are in arrears. In order to keep the Times coming be sure your subscription is paid up. This notice will not affect resident ratemakers of the Municipality of Battle River whose subscription is paid by the Municipality.

We are preparing the mailing list and have ordered an extra supply of paper which we expect will be here for the issue of March 28th, when each resident ratemayer in this Municipality will receive the Times.

NEWS ITEMS FROM KINSELLA

Mr. Louis O'Leary claims the distinction of being the first one to receive air mail at Kinsella. The letter was put on the first air mail plane to leave Winnipeg on Tuesday and delivered at Edmonton, coming to Kinsella on Wednesday noon by train. It was sent by his brother, a retired farmer residing in Winnipeg.

George Lee sold a quarter section of land known as the Victor Reed's farm joining the north side of the town, this week to John Zelinski. It is understood that John Zelinski is now instrumental in putting the deal through, and that a friend of his, is the actual purchaser. The price paid was reported to be sixteen hundred dollars cash.

V. A. Justik has sold his blacksmith shop, together with all tools, etc., and has completed arrangements to take over the blacksmith shop at Kinsella. He will also have charge of the Massey Harris Agency in that town.

The Massey Harris agency which has been looked after by Mr. Justik here has been taken over by J. F. Murray, who is at present busy moving the stock over to his own premises on Main Street.

Frank Williams who some two weeks ago had the misfortune, when in the act of delivering goods to the Creamery to slip and injure his back, has returned home from the Viking hospital. Frank is feeling fairly well though he will be unable to work at his trade as mechanic for some time.

Word has been received that Andersson, a recent immigrant from Norway was taken seriously ill with an acute attack of appendicitis while on a visit at Edmonton. Mr. Andersson and Ed Overbo who were occupying the same room overnight, notified a doctor, when his condition became very painful, who ordered his immediate removal to the hospital. An operation was at once performed, when it was discovered that the appendix had burst. He is reported to be doing as well as can be expected.

The dance held in the Ecco school on Friday, March 8th was well attended and a good time was reported by all.

Harry Miller has returned from being confined to the Viking hospital from the effects of a broken bone in his leg and was seen in town on Saturday still in crutches, but apparently well on the way to recovery.

Miss Maxine Wachtel is unable to walk about with the aid of crutches, since her recent accident while skating, when she fell and broke a bone in her ankle.

Mrs. John Scott, official delegate of the Kinsella Women's Institute, has been chosen to present a gavel to the provincial president, Mrs. Montgomery, at the district conference in Drumheller this month. In order to raise funds the members have agreed to practice self-denial and turn in the proceeds to the W. I.

For a number of years attempts have been made to put a herd-law into effect in Divisions 1, 2 and 3. It has been felt by many that the time has come to stop all stock from running at large, as the open range is pretty well used up. A vote was taken in this recently which resulted in establishing the herd-law in the above mentioned divisions, being the South half of the Kinsella Municipality No. 424.

A good time was had at the dance held in the Lake Vernon school under the auspices of the committee in charge of social activities on Friday evening, March 7th.

A Masquerade Dance is being put on by the same committee on Friday evening, March 21st.

The play and dance put on at the Overleigh school on Friday evening last, was attended by a large crowd and proved a huge success. Much credit is due those responsible for such a fine evening's entertainment. While the people of the Overleigh district do not plan on very many plays and dances during the season, the ones that are put on usually exceed all expectations and are a great success.

Clothes don't always make the man when in town. Refresh yourself: Try a First Class Meal or Lunch at the Hotel Irma.

THEY MAY STRIKE OIL THIS TIME

The Duluth Syndicate that brought in the 30,000,000 cu. ft. gas well last fall, 12 miles north of Kinsella, and eighteen miles north east of Viking, are making preparations to drill another deep test well one mile from the location of the present well. The new hole will be started with 24 inch pipe which will be gradually reduced until ten inches at the bottom. This will be the largest well drilled in this field and one of the largest ever started in any field in Canada. Supplies are now being hauled to the location and drilling will commence as early as possible. It is quite generally believed that the company will make an earnest effort to locate the oil sands which are certain to be found somewhere in this field.

NOTICE MEETING OF ELECTORS

VILLAGE OF IRMA
Public Notice is hereby given that a meeting of the Electors of the Village of Irma will be held at the Municipal Office on the 24th day of March, 1930, from eight o'clock p.m. until ten o'clock p.m. of the said day for the purpose of nominating candidates for Councillor for the said Village of Irma for the ensuing year.

Dated under my hand at Irma this 15th day of March, 1930.
Chas. Wilbraham, Returning Officer

FORMER PRESIDENT TAFT DIED ON SATURDAY

William Howard Taft, former president and former justice of the United States, passed away last Saturday afternoon at his home in Washington, D. C. He was in his 73rd year. The ex-president had a summer home at Murray Bay, Quebec, where he spent the summer months. He was a great admirer of the administration of justice in Canada, and during his annual visits to the dominion made a host of friends in all walks of life, that join in mourning the loss of an eminent statesman and a real friend.

SPRING CLEANING

It is not too early to send in household articles such as curtains, drapes, rugs, table covers, dresser scarves, bed spreads, bedcovers, etc. for dry cleaning. It is also well to consider the dry cleaning of articles which are to be put away until next winter. It is a fact that moths will not readily attack articles that have been scientifically dry cleaned.

TEA

'Fresh from the gardens'

The True Spirit

At the first showing at Ottawa of the moving picture record of the great Boy Scout Jamboree, held in England last summer, in which 50,000 boys from all parts of the world participated, His Excellency, the Governor-General, Lord Willington, in an introductory speech, spoke to the Boy Scouts and Girl Guides present "very particularly and in all seriousness," saying:

"You, young as you are, must know, we all know, that since the years of the Great War, all the nations of the world have been striving by conferences, by pacts and agreements, and by personal negotiations to get rid of the terror of future warfare. The League of Nations has during the past ten years done a great and noble service to secure this end. But I am inclined to feel myself that this younger League of Nations is the most hopeful organization to achieve what we are striving for."

"Under this association you are all growing up filled with the spirit of goodwill and good fellowship to all others, to do your good turn each day to one another, in whatever country your future work may find you, whatever the race and colour of that other may be. I beg of you all to let that spirit guide you in your future lives, for it is by that spirit which teaches us to think well and not ill of our neighbor, that we shall in time attain our great goal, peace among the nations of the world."

These words of His Excellency are most timely because, if there is any one thing calculated to nullify the efforts of statesmen in all countries, destroy the unifying work of many organizations, and bring to naught the prayers of millions of people, it is the persistent and poisonous propaganda of a few evil-minded persons who see gain for themselves, or temporary advantage for some cause they espouse, through the division of peoples and nations along racial or religious lines, and the cultivation of feelings of suspicion, ill-will, and antagonism among and between them.

It is probably too much to hope that those individuals who are serving their own selfish ends by such unpatriotic conduct at home, and destructive of peace and brotherhood abroad, will cease from their evil ways. They are fully alive to the harm they are doing, but that counts for nothing with them because they are reaping some small and temporary selfish benefit themselves. But there are bright hopes for the future if the boys and girls of today learn the better way, and in the activities of everyday life emulate the life and example of the Great Teacher who went about doing good to all men, who taught men that love is better than hate, who refused to recognize any distinction between men of different races or creeds, but emphasized at all times the common brotherhood of man and Fatherhood of God.

Just as the serpent brought evil and discord into the first Garden of Eden, so do the serpents of today in many disguises seek to keep alive all the ill-will, suspicions, prejudices and passions engendered in the bygone years of a less civilized era in the world's history. These fermentors of strife at home are the first line of defence maintained by those who desire for gain to keep the nations armed to the teeth, and who foment and precipitate wars.

The League of Nations is striving with every means at its control to ally racial suspicions and ill-will. While engaged with practical problems of disarmament, and other concrete causes of strife, the League is devoting possibly even more attention to educational influences. The efforts made to raise the status of women and children in backward countries, to improve labor countries everywhere, to put an end to white slavery and the traffic in narcotics, all have as their underlying object the removal of causes of friction, misunderstandings, and ill-will among people, and the development of a spirit of world brotherhood. The Balkans have long been recognized as the danger spot of Europe, and the reason is found in racial and religious suspicions and prejudices. Once these can be allayed, peace in Europe will be largely assured.

Lord Willington sees in the Boy Scouts and Girl Guides one of the most hopeful movements for future world peace, while Sir Philip Gibbs has declared that the Junior Red Cross in banding the youth of all nations under the common banner of service for humanity, offers the most hopeful sign of the dawning of a better day. The Y.M.C.A. is engaged in the same work among young men of all races, colours and creeds.

Evil-minded men may stir up strife for a time here and there; they may appear to reap a measure of success; but it is temporary, and when the passion of the moment subsides, and people realize how they have been fooled for an ulterior purpose, it will be found their actual achievements have been nil. Hate may influence people for a time, but love in the long run will conquer. It always has; it always will, for love alone is enduring.

Co-Operative Packing Houses

Plans For Establishment Of Three Plants Are Under Way In Alberta

Co-operative packing houses in Lethbridge, Calgary and Edmonton are projected by the Alberta Live Stock Pool, and plans for the establishment of a trio of plants are under way. The idea of a centralized co-operative plant at Calgary is said to have been abandoned in favor of the three plants serving the southern, central and northern sections of the province.

Manitoba produced butter, cheese, milk, ice cream and sweet cream to the value of \$14,967,851 last year.

When Pain Comes

What many people call indigestion, very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

New Material For Ships

Will Make Vessels Practically Unsinkable, Says German Inventor

While the delegates to the five-power naval disarmament conference in London, are trying to limit or reduce the navies of the world, a German inventor named Franz Felder, demonstrated a new material for ship-building that is alleged to enable warships to carry twice as many guns as they could normally, and to make them practically unsinkable.

Herr Felder displayed the buoyancy of his patented materials with model ships. One of them, which was a yard long and a foot wide, supported a load of 120 pounds, while a wooden model of the same dimensions went to the bottom of the water with a similar load.

The inventor hopes to build a motor ship to show the possibilities for the use of his materials, which are in the carrying of commercial cargoes.

ARE YOU RUN DOWN AND NERVOUS?

All That Is Needed Is A Tonic To Build Up The Blood.

There are thousands of people who really find life a burden. They have endured nervousness, sleeplessness and a general run-down feeling so long that they have given up hope of again enjoying good health. Rest and a blood-building tonic are all that is required to restore health and vitality. Such a tonic is found in Dr. Williams' Pink Pills. They are recognized the world over as a wonderful blood-builder and nerve restorer.

Mrs. F. C. Granier, Toronto, Ont., bears testimony to the worth of these pills. She says: "Five years ago, after a life of perfect health, I became ill. Not seriously at first, just no appetite, no pep and no sleep. I gradually grew worse. I became pale and listless; my arms and feet were badly swollen and although I doctored all winter my condition did not improve. In the spring I went to see a specialist and he sent me to the hospital where I remained for seven weeks. I left the hospital in worse condition than when I entered it and went home a nervous wreck. I remained ill all home all summer and entered the hospital again in the fall where I was under observation for three weeks and although I was given everything possible was done for me I did not improve. Shortly after this a friend advised me to take Dr. Williams' Pink Pills as a blood builder so I sent for a supply. I do not know when I first noticed an improvement in my condition. It seemed to come to me gradually. I began to sleep better; my meals so long discontinued were being eagerly received and enjoyed. I began to show an interest in what was going on around me and came back to my normal strength and my limbs. A persistent in the use of the pills and soon I was well and happy again. That is five years ago and ever since I have been able to do all my household work and have not had the least return of my former trouble."

If you are feeling run down give Dr. Williams' Pink Pills a fair trial and your health will be yours. You can get them from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Seed Cleaning Train

Two Cars Will Tour Saskatchewan During Month Of March

The Saskatchewan Department of Agriculture is co-operating with the Canadian Pacific Railway in operating a seed-cleaning train of two cars which will tour the province, beginning March 8th. Seed cleaning machinery will be explained and demonstrated, and addresses and discussion will feature the visits of the train to the various rural centres. The slogan of the occasion is—"So clean seed, grow less weeds."

Dread Of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are ward off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

Bull Fighting In Spain

The 1930 bull-fighting season will be inaugurated in Madrid, in the old Plaza de Tores, but in April the new Plaza will be dedicated. The new arena seats 26,000 persons, or double the capacity of the old one, and one of the best fights to take place therein will be a benefit for the University City (Ciudad Universitaria), now under construction.

Edmonton Stock Yards

During the year 1929, a total of 3,739 cars of livestock were received by the Edmonton Stock Yards Limited, as compared with 3,960 the year before. In the year 1929 there were fewer hogs, sheep and horses shipped but more cattle and calves.

Interpreters At Geneva

Speeches Have To Be Translated Into English and French

Dr. Caroline MacDonald, of London, Ontario, who has spent many years in Tokyo, in social service and prison reform work, last year accompanied the Japanese labor representative to the International Labor Conference in Geneva, as interpreter. There was no easy task, the Eastern and Western languages differing so radically. During the ten days' preparation in Geneva for the great conference, which lasted three weeks, Dr. MacDonald had to translate all speeches from the Japanese to the English, as English and French were official languages to be used, and following the address of the Japanese representative, she mounted the tribune and gave it in English to the non-Japanese speaking section of the audience.

The interpreters at Geneva are the eighth wonder of the world, says Dr. MacDonald. By an ingenious arrangement of telephones in the hall of meeting, interpretation of the speech was into two or more languages followed one sentence after the actual delivery. Telephones were at each desk, and each member dialed on whatever language they wished to hear.

Having Faith In People

Life Would Be Miserable If We Distrusted Everyone

Although faith in people gets a severe shaking at times, it is never destroyed. If it were, it would be a miserable thing to try and carry on business at all.

Imagine having to regard as a snark every man with whom you have dealings until he has proven himself to be reliable. You wouldn't want to have any person visit you in your home under that sort of an atmosphere; you wouldn't want to place an order for merchandise over the telephone; you wouldn't want to go to a lodge meeting or become identified with any other organization.

The great overwhelming majority of people are honorable; they will deal fairly with you; very many of them will go out of their way to try and help you along. If it were not so existence would be a miserable thing indeed.

One of the most effective vermifuges on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

Chinese Chickens Fatter

Many restaurants in New York who buy chickens in great quantities are having them sent over from China. The breast of the China chicken is much larger than the breast of the American one. It seems in the almond-eyed country they feed them better than they do here and consequently there is more meat on the bird. They are being shipped to New York by the carloads.

For Catarrh—It is one of the chief recommendations of Dr. Thomas' Electric Oil that it can be used internally with as much success as it can outwardly. Sufferers from catarrh will find that the Oil when used according to directions will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

Colonel, inspecting barracks: "Supposing the barracks were to catch fire what would you do?"

Bugler: "Sound me bugle, sir!"

Colonel: "And what call would you give?"

Bugler: "Cease fire, sir."

Minard's—50 Year Record Of Success.

Manitoba Poultry Pool
Thirteen million dozen eggs were marketed in 1929 by the central selling agency of the Manitoba poultry pool, according to a statement at a meeting in Winnipeg. Membership in the pool is 14,000.

Russia Is Purchasing

Cattle In Uruguay

Soviets Are Anxious To Repopulate

Greatly Diminished Herds

Soviet Russia is looking to Uruguay to repopulate her heavily diminished cattle breeding industry. She has contracted with a Russian agrarian, long a resident at Montevideo, to tour the Soviet Republic lecturing on the cattle industry as practiced in Uruguay.

At the same time the Soviet has purchased 250 Uruguayan Hereford bulls for reproduction purposes and indicates she may buy as many as 100,000. For animals from two to three years old the Soviet is paying an average of \$150.

While Argentina's vast cattle industry is based on the importation of British thoroughbred short horns, Uruguay's cattle herds were fattened by American Herefords, which were found better suited to resist ticks and other Uruguayan cattle diseases, as well as this particular climate. Soviet Russia is therefore using grandsons and great-grandsons of animals which first saw the light of day on American prairies.

Life Saved By Hymn

British Soldier Suspected Of Being A Spy, Had Narrow Escape

How a British soldier escaped death as a suspected spy at the hands of the French by singing a hymn, was related to the Chapel-en-le-Frith (Derbyshire) Board of Guardians.

The map Joseph G. Davidson, who had sought relief during a recent indisposition, served with the Expeditionary Force in France during the war. He was taken prisoner, and after spending 2½ years at various camps in Germany escaped into the French lines. Here inquiries were made about Davidson, and information was received from the British G. H. Q. that the man had been killed in action.

The French promptly ordered him to be shot as a spy, but a few hours before the firing party was ordered out, a wounded British soldier asked Davidson if he could sing. He sang "Abide With Me," and this so impressed his captors, that they made further inquiries, and eventually released Davidson.

Persian Balm appeals instantly to the dainty woman. Stimulating to the skin, making it velvety soft in texture, it creates and preserves complexion. Delicately perfumed, it is fragrant. Cool and delightful to use. Especially recommended to the young and the old. Stimulating and invigorating. Imparts a youthful loveliness and protects and enhances the most delicately-textured skin. Persian Balm is the unrivalled toilet requisite.

Odd Use For Eggs

You might not know it, but the same eggs you use for cooking are used for tanning glows, and this industry is the cause of importing more than 800,000 eggs a year into England. Only the yolk of the egg is used in the tanning process.

There are, at present, only two places in Europe where the accordion is not despised—Scotland and Belgium, the latter country possessing 9,000 accordion players.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

Chest Colds Need Direct Treatment

It is an obstinate cold indeed that can resist the direct double action of Vicks. Rubbed on the chest, it acts 2 ways at once:

- (1) Direct to air passages with its healing vapors released by body heat;
- (2) Direct, like a poultice, it "draws out" the soreness.

An Unusual Picture

Sunset On Moon Taken With Motion Picture Camera

Motion pictures showing sunset on the moon was one of the features of the annual exhibit of the Carnegie Institution, of Washington.

The film was made at the Mt. Wilson Observatory, in California, with a motion picture camera attached to the great 100-inch reflecting telescope. Like the earth, the moon rotates, thus causing the sun to rise, cross the sky and set, but as the moon takes twenty-seven and one-third days, instead of twenty-four hours to rotate, lunar sunrise and sunset are more leisurely than the earthly variety. Because there is no atmosphere on the moon, there is no twilight, and the sunset represents a sharp change from brilliant sunlight to darkness, instead of the gradual diminution of light on the earth. The film shows the shadows of the lunar mountains crawling across the surface. The actual times occupied in the taking of the film was five and one-half hours, but it is speeded up in projection, and runs through in a minute and a half.

A Dog's Paradise

Not a single flea exists in the South African town of Prieska. Scientists working on a plague prevention survey of Africa, conducted wide searches for the elusive insect but at Prieska none were found. It is on the Karroo prairie, Prieska is now boasting itself as the "plague-proof" town, and dogs of all nations look upon it as paradise.

Whether we pronounce radio—radio or raydio, or work wrek or ether, there will always be plenty of either and ether.

Western Canada's Seaport Will Be Scene Of Great Activity During The Coming Summer

When Churchill, on Hudson Bay, Canada's newest seaport, opened sometime in the summer of this year, it will be the scene of an interesting social experiment. The land within the limits of the townsite will not be sold but will be leased by the Manitoba Government, under whose administration the townsite comes.

Since Churchill was chosen in 1917, as the seaboard terminal of the Hudson Bay Railway, it has been a great camp, with hundreds of workers engaged in harbour and railway construction in the summer and a small staff in charge of the plant in winter. But, as the chief depot of the new trans-Atlantic route by way of Hudson Bay, it is expected to be at once a centre of important interests, such as transportation, mining, grain handling and fishery. The harbour improvements that have been planned cannot be finished earlier than 1932, and the presence of the army of workmen engaged in this development will give the new town a favourable start. Rail connection is now completed over the whole stretch of 511 miles from the Pas to Churchill. Regular trains run over a part of the line, but winter connection is not maintained at present to the Bay. The entire line will, it is expected, be in regular operation in the spring of 1931.

Though the future of Churchill is regarded very favourably by many, the inflation which has attended such sentiment in the case of other prospective railway centres has been wholly prevented by the refusal of the Manitoba Government so far to give rights in lands of the townsite. The provincial government of Manitoba, availing itself of facilities afforded by Dominion authority, has prepared plans for the development of several towns of the north, including Churchill. It is expected that Churchill will be open to newcomers early next summer. The effects of planning and of the new system of landholding will then be seen.

The Hudson Bay Railway has been built by the Canadian Government and will be operated by the Canadian National Railways.

Cheapest Form Of Selling

Newspaper Ads Pay Best and Bring Quick Returns

"I know of no other method at once so quickly productive of results as advertisements in the Press," said Sir Charles Hignam, at the Institute of the Motor Trade dinner, in London.

The cheapest and most effective way by which the local dealer, or anyone else, could advertise, was in the Press. They all knew, he said, that unemployment could only be solved by selling more goods.

"The public," Sir Charles added, "know that newspapers do not accept advertising for unreliable goods or services, and that they can buy the goods advertised with the confidence that they are worth what is asked for them, and that they are guaranteed. Such is the power of Press advertising today, that it has become the cheapest form of selling."

Well Served With Railways

Sumas, Wash., a town of less than 200 inhabitants, on the Canadian border south of Vancouver, B.C., lays claim to being the smallest town on four transcontinental railways.

Not only that, but Sumas is the terminus for three of these railways which include the Chicago, Milwaukee, St. Paul & Pacific, the Northern Pacific, the Great Northern and the Canadian Pacific. In addition, the town is a terminus for the British Columbia Electric.

While it costs \$40 a week to feed a sea lion at the London Zoo, a jungle lion receives 16 cents worth of cats' meat a day.

Goldenrod is almost exclusively a North American plant.

"Daddy, I have swallowed the apple I was saving for mother."
"Heavens! Does it hurt?"
"Oh, no. I chewed it first."—Lupine Blatter, Berlin.

English Names

Family Names Not Always Pronounced Phonetically

There is a certain story about the American, visiting in London, who told an English friend he was going to spend the week-end with some people named Marjoribanks (which he pronounced Mar-jor-banks) who lived in the county of Leicestershire (which he pronounced, Leicestershire).

The Englishman promptly told the old top that he must say he was visiting the Marchbanks, in Leicestershire. And to tell the truth this thing of pronouncing British names is always a puzzle, not to say a social danger. Men whose front cognomen is Ralph insist that it be pronounced "Rafe." But there are many family names which are not pronounced at all the way they are spelled and the way they took. For instance:

Pole-Carew, pronounced Pulcarrey; Colquhoun, Kohoon; Wemyss, Weems; Leveson-Gower, Looson-Gore; Bertie, Barrie; Kerr, Kair; St. Maur, Seymour; St. John, Sijnin; De Moleyns, Demulline; Dalziel, Dee-el; Tallafra, Tolliver.

If this isn't taking a lot of liberties with the dear old English language for unexplained reasons, well, what is it?—Franklin Star.

(By Annabelle Worthington)

3015

Chic dressmaker details are smartly evident in this sapphire blue crepe silk with holoer suggestion at the right side of the front.

The flat hips with soft swathed treatment at front, emphasizes the higher waistline, so important in the mode. The irregular closing of collarless neckline is unusually becoming.

The circular tiers provide charming fluttering fullness that sways gracefully when wearer moves.

It proves that good taste is not expensive, for here is a Paris model that you can copy exactly at the cost of the fabric, and have the added advantage of choosing a flattering colour.

Design No. 3015 comes in sizes 16, 18, 20, 22, 24, 26, 28, 30 and 42 inches bust.

It is exquisite in crepe Elizabeth in dahlia purple shade for afternoons and Sunday evenings.

Black crepe silk is dignified for all-day occasions.

Tomato red crepe is decidedly youthful.

Pattern Price 25 cents. Be sure to fill in size of pattern.

No Bargains In Seeds

Farmer Should Buy Best Obtainable Says New York Expert

There are no bargains in seeds, states M. T. Munn, state seed analyst for New York, who declares that many other things beside price should enter into the selection of purchases of this kind. Quality as indicated by purity, germination and trueness to name is the important thing. "It is a very safe practice to give no attention whatever to advertisements of seeds where the price is the only description given of the stock being offered for sale," states Mr. Munn. "Price is too often the bait upon the hook for those who bite upon bargain seeds. Experience has repeatedly demonstrated that it is far cheaper in the end to buy the best seeds obtainable than to take as a gift cheap, low-quality weed-infested seed."

The same sort of advice is uttered by Canadian seed authorities. "A man should be just as careful in securing his seed supply as he would be in buying a horse," states W. J. W. Lennox, of the Dominion Seed Branch. "In fact, even more care is necessary, because the seed procured this year will soon spread over the whole farm, whereas a poor horse can be sold and the loss is written off without any further damage."

With results of seed surveys conducted in every part of the Dominion which indicate clearly that the average farm seed used is very badly infested with weeds, there is only one safe course to pursue. Both Mr. Munn and Mr. Lennox urge the buying of tested seed, seed that has been analyzed in one of the five Government laboratories scattered throughout Canada and has been approved by them for selling purposes. Seed of this kind always falls in the Government graded class. "When you are offered a No. 1 horse at a low price," states Mr. Lennox, "you immediately start looking for defects, and if you do not know very much about a horse you will have him taken to a veterinary for examination." Mr. Lennox urges the same rule in connection with the seed supply, advocating that purchase of Government tested seed, or if the home-produced variety is being used having it analyzed in the nearest Government laboratory before sowing.

Stated His Requirements

Servants Of Today Would Laugh At This Advertisement

Credit should be given the Detroit News for unearthing the following advertisement of 1796, through which a citizen of Philadelphia sought to procure a suitable servant.

"Wanted for a sober family, a man of light weight, who fears the Lord and can drive a pair of horses. He must occasionally wait at table, join in household prayer, look after the horses and read a chapter of the Bible. He must, God willing, rise at 7 in the morning and obey his master and his mistress in all lawful commands; if he can dress hair, sing psalms and play cribbage the more agreeable. He must not be familiar with the maid servants, lest the flesh should rebel against the spirit, and he should be induced to walk in the thorny paths of the wicked. Wages, 15 guineas a year."

"Won't you walk as far as the street car with me, Tommy?"

"I can't."

"Why not?"

"Cause we're going to have supper as soon as you go."

Complete \$50,000,000 Viaduct

Plans made a quarter of a century ago bore fruit in Toronto recently, when Canadian Pacific Railway train No. 3100 pulled a long line of passenger cars over the embankment and brought them in to track three platform on the high level line of the Union Station. His Honor Mayor Bert S. Wemp was on board the giant C.P.R. engine and received his first instruction in driving from Engineer T. Lloyd. U. E. Gillen, general manager of the Toronto Terminals Railway Company, told His Honor that all trains would be operated on the six high level tracks by April 15, and that work on six other tracks would be commenced at once and would be completed by the end of 1930.

SEED CLEANING CARS

A special train—a University on Wheels—has been equipped by the Canadian Pacific Railway to enable the farmers of Saskatchewan to avail themselves of the opportunity of receiving the latest information on seed cleaning and seeing machinery used in connection therewith. This lecture train will be in charge of officials of the Field Crops Branch, of the Saskatchewan Department of Agriculture and will travel over Canadian Pacific lines.

Have Taken To Air

People Of North Country Substituting Planes For Dog Teams

Practically all other means of travel in Mackenzie River district have now been superseded by the airplane, according to H. C. Ingram, inspector of civil aviation, who has just returned from an inspection trip over the shingles running to Aklayik, Yukon territory.

Mr. Ingram declared he was unable to travel the full route owing to the fact that he was delayed by fog. He went as far as Fort Resolution, 750 miles north of McMurray, returning with "Punch" Dickens of the Western Canada Airways. He reported the people of that part of the country to be fully air-minded. He observed only two dog teams along the northern route.

Manitoba Buttermakers

Carried Off Dominion Butter Championship At Ontario Convention

Manitoba buttermakers, at the recent convention of the Western Ontario Dairyman's Association, in London, Ontario, carried off the Association's trophy, emblematic of the Dominion's butter championship, according to Frank Horne, secretary of the Association. It is the first time in the Association's seven years of operation that the trophy has been taken out of Ontario—in this instance to go to the Manitoba Co-Operative Dairy of Brandon. Yeast and mould scores were taken into account and a chemical analysis made at Ottawa. This caused a delay in announcing the winner.

Want Highway Completed

Completion of the road between Winnipeg and the Ontario boundary, as a link in the proposed national highway, was urged upon the provincial government in a resolution passed at the 20th annual meeting of the Manitoba Good Roads Association.

National Museum At Ottawa a Treasure House Of Wealth and Monument of Canadian Progress

Dr. Charles Cammell, L.L.D., F.R.G.S., Deputy Minister, Department of Mines, Ottawa, addressing the Professional Civil Servants of Canada and their friends in Ottawa recently, said in part:

I would like you, for a few minutes, to share with me a vision that has gripped the minds of some of us during the last few years. Looking ahead forty or fifty years, we see Canada, the home of a strong and prosperous people with twice or thrice the population it possesses today. Montreal, Toronto, Winnipeg and Vancouver, are great centres of world commerce, known to every school child in Europe as well as in America. Ottawa remains the political heart of Canada, a city unequalled on this continent for the beauty of its surroundings and the dignity of its public buildings. It is the pride of Canada, and the admiration of all America, a capital city worthy of the prosperous and progressive nation that holds a leading place among the nations of the world.

Here within this city of Ottawa, the capital of Canada, we see, amid other structures, a large and splendid building containing inside its walls a picture in miniature of the country's wealth and natural resources. We see a National Museum of Canada, a museum that houses samples of every rock and mineral, every animal, bird and fish, every seed and plant, and every variety of flora that can be found on Canadian soil, or in Canadian waters, from Nova Scotia to British Columbia, and from the International Boundary to the Arctic Islands; a sample of every object that has its home within our territory and contributes to its prosperity and beauty. This National Museum is a treasure-house of our national wealth, a monument of our national achievements, and an educational and research institution that proclaims our natural resources and investigates some of our national problems. Everything that early explorers set their eyes upon is represented there—Indians clad in furs and armed with war-clubs or with bows and arrows; the buffalo, the beaver and the various bears; rare flowers from the Rocky Mountains, fine timbers from the British Columbia coast, and nuggets of gold and silver from the Yukon and the Northwest Territories. Here, too, is every natural object that concerns the farmer; types of soil and their special qualities, different varieties of wheat and methods of combating their diseases, all the fruits and vegetables and the ways of controlling their insect pests. The prospector, the miner and the geologist find in this museum every rock and ore that exists in the Dominion, with illustrations of their uses and samples of all the products we derive from them. The fisherman sees specimens of every fish, the methods of capturing them and of preparing them for the market. The lumberman sees his timber in every stage of growth, and learns how to fight the beetles that ravage his standing trees. It is a great museum illustrating the natural history of the whole of Canada, a museum that ranks beside the similar museums in New York and Washington, in London, Paris, Berlin and the capital cities of all the greatest countries in Europe and America.

Yet it is not a dead museum, full of dry bones, stuffed animals and rocks covered with the dust of long years, but a museum that is ever active and ever growing. Everything within its walls is both attractive and instructive. The children who crowd its doors from mere curiosity learn something unconsciously, the tired business man goes away refreshed and informed, the critical foreigner receives new impressions of the greatness of Canada and its natural wealth. There is a special staff to answer enquiries, to deliver addresses on Canada's resources, and to send out information to every part of the country. Manufacturers visit or write to the museum for ideas that they can use in their business; industrialists to find out our resources in coal. Cities and towns obtain help in building up local museums in the provinces; and schools from Halifax and Quebec to Vancouver borrow motion pictures that teach our children the geography of Canada, its plants and animals, its mines and its water-powers. There is a research staff that studies the history and the problems of the country, that co-operates with other government departments and with universities and museums throughout the world, and that increases the fame of Canada as a home of science and learning.

This is our vision, and already the Dominion Government has taken the first steps towards its realization. It has established in Ottawa, the foundations of a National Museum, given

It a building large enough for the next few years, equipped it with a small but active staff, and allotted a small sum of money each year for its maintenance. The advancement of this institution, the expansion of it into a great museum portraying the resources of the entire country and the achievements of its people, this it lays squarely on the shoulders of the people of Canada themselves. It looks for the support and assistance of every citizen, from the leaders in the financial and commercial world to the laborer on the farm and the workman in the mill. For a National Museum belongs to the entire country, and, like the great museums in London and Paris, registers the progress and civilization of that country in the eyes of other nations. So I would ask you to share our vision, and to join with us in striving to make it a reality, in building up in Ottawa, the Capital of the Dominion, a National Museum worthy of Canada's rank among the nations.

Has His Good Points

Crow Does His Share In Reducing Injurious Insects

If the crow were a pattern of virtue instead of being the smartest rascal in feathers he would probably be so perishable that societies would have to be started for his preservation. Good character does not insure survival in wild life. Here is one of the few native American birds, perhaps the only one, that can be domesticated, yet which is in such bad repute that the Biological Survey feels called upon to explain that it is not trying to protect the crow when it means some of the good points of the black outlaw.

The biological experts almost apologize for suggesting that the crow should not be quite exterminated. The loss of the species would joggle the balance of nature. They approve the farmer's guerrilla warfare on the bird, while deprecating drives for wholesale destruction. The crow does his share in reducing injurious insects, but his greater liking for forbidden crops permits no let-up in the home-made scarecrow industry. The crow is a born bandit, but no hypocrite—"Open and above board in all his ways and doings," said John Burroughs. The Biological Survey does no harm in devoting a few generous words to a self-reliant sinner who needs no closed reasons; whose defiant caw-caw-caw will be heard as ever in field and wood long after the scream of the last American eagle has died away.

Prosperous Manitoba

No Other Place Has Shown Greater Development In Last Forty Years

Hon. D. G. McKenzie, Manitoba Minister of Mines, states no other place has shown greater development in the last forty years than Manitoba, and that the residents of the province had more reason than others to look to the future with that faith and confidence displayed by the builders of the Canadian Pacific Railway, and by Lord Selkirk's settlers.

Federal Farm Loan Board

Since the inception of the Federal Farm Loan Board, 1,464 loans have been approved, totalling \$3,026,050, or an average of \$2,067. Of the provinces participating, British Columbia farmers borrowed \$687,800; Alberta, \$1,545,100; Manitoba, \$48,800; Quebec, \$218,100; New Brunswick, \$396,550; Nova Scotia, \$121,600.

Alberta Savings Certificates

The sale of Alberta Government savings certificates in 1929 reached a total of \$9,856,466, and represented, with the one exception of the year 1928, the largest annual amount so invested. Savings now outstanding amount to \$11,776,163, and purchases made since 1917 total \$64,575,978.

What the Law Makers Are Doing in the Legislature

With five solid weeks completed, the 1930 session of the Legislature of Alberta is drawing to a close. As the days grow longer and warmer the rural members begin to get uneasy and the session will probably close on or about March 21st, the first day of spring. The week just passed has seen the practical passing of The Wheat Guarantee Bill and the completion of the Estimates. Before prorogation four matters remain: Re-distribution, the new School Act, the Mines Act, and the final stages of the Security Frauds Prevention Act.

Whether it will be prorogation or dissolution has not yet been announced but those who think they know say that there will be no election this summer.

The Wheat Pool Guarantee Bill passed its second reading on Monday, went through Committee of the whole House on Tuesday, and now awaits only the formalities of third reading and royal assent. The second reading brought out strong Liberal and Conservative criticism of minor points and of the Premier's methods though they agreed with the principle and voted for the bill. J. T. Shaw, Bow Valley, the Liberal leader, said that though he would not oppose the bill the government must accept the entire responsibility and full blame in case of disaster because the Premier had not given out enough information. In the other provinces the opposition leaders had been called into conference by the premiers. Further, "the bill did not prevent the Pool from making fresh advances to members or from securing further bank loans, Col. C. Y. Weaver, Cons., Edmonton, charged that the Pool had departed from the principle of orderly marketing by buying wheat and by buying it on options. He wanted a time limit set to the guarantee. D. M. Duggan, the Cons. leader, declared his sympathy with the Pool movement. He had been chairman of the first pool meeting held in Edmonton. For all his sympathy he didn't care to hand a blank cheque to the Wheat Pool. Further, he thought that the 45 per cent of the farmers who did not belong should get some benefit from the government support. W. H. Shield, U.F.A., Macleod, in reply declared that the non-pool farmer would soon suffer if the Pool should fail. He suggested that since a Liberal-Progressive Premier in Manitoba, a Conservative Premier in Saskatchewan, and a Farmer one in Alberta were satisfied, their judgment should be good enough for the opposition. Mr. Brownlee then dealt fully with all objections. He had given to all members of the House information which had been given only to the leaders in the other provinces. He had withheld only information which could be of value to the business of the Pool, that is, the amount of sales already made, the amount of wheat held by the Pool, and the purchases of the Pool made to stabilize prices. He expressed his belief that the Pool had done right in buying wheat to prevent the price going out of sight. Help given to the Pool helped all farmers, whether members or not. Business men had expressed their satisfaction to him in this backing the Pool. The second reading passed unanimously.

The adjourned debate on the motion of D. M. Duggan, Cons., Edmonton, calling for the abolition of the Alberta Provincial Police and their replacement by the Royal Canadian Mounted Police was then resumed by Mr. Lyburn, the Attorney-General. He outlined the work of the present force showing that they are much more than mere police. Money saved by the change, and he wasn't convinced on that, would be eaten up in hiring inspectors and game guardians. It was well, too, to have the police under the direct control of the provincial government. He concluded with a strong appeal to the House to back up the police if they wished to have an efficient force. Geo. Webster, Lib., Calgary, thought they should be called the Alberta Prevention Police if they did all that Mr. Lyburn said they did. He emphasized the considerable saving that would accrue by the change. Col. Weaver, Cons., Edmonton, showed that there was no danger of "remote control" for in Saskatchewan the R. C. M. P. took orders directly from the Attorney-General. M. C. McKee, U.F.A., Lac Ste. Anne took the attitude that only the rural members really understood the situation and apparently none of them wanted a change. Sam Brown, U.F.A., High River, pointed out that a new A.P.P. might have to be rebuilt if at the end of 7 years a satisfactory renewal agreement could not be made with the federal government. J. T. Shaw, using R.C.M.P. reports and Saskatchewan estimates built up a strong case by showing that the R.C.M.P. carried out provincial statutes there. The leaders of the govern-

ment seemed a little worried though not convinced. The whole question hinged on the extra work done by the A.P.P. It is more than merely a re-people who have broken laws. The Conservatives were not satisfied with the "Ayes" and "Nays". The Speaker then rang the division bell and after the sands had run through the hour-glass the required number of times, the Clerk of the House called the roll. The Conservatives and the Liberals, except J. W. Frame, Athabasca, favored the change but government and Labor united to defeat the motion.

First reading was given to a bill to establish a department of natural resources and second reading to the Security Frauds Prevention Bill. The bill was opposed by the lawyers, Shaw and Weaver, as giving too much power to the Attorney-General and to the Executive Council. The Council should not be able to make a man a criminal by a mere regulation according to Col. Weaver.

The discussion of the estimates for the Executive Council gave Mr. Webster, Liberal member for Calgary another chance to attack Mr. Greenfield and the London office, which requires a vote of \$18,265 to support it. Mr. Brownlee rose to the defense declaring that Mr. Greenfield had done much to aid the development of Turner Valley by securing technical advice and capital in England. When the estimate for \$106,562 for the support of the labor bureau came up, the member for Innisfail, Donald Cameron, took the opportunity to attack the policy whereby Central European immigrants were being dumped in Edmonton at this very time. He blamed the low railway rate from the east coast to Edmonton (\$33.) At this state of affairs and appealed to the government to take some action. An investigation into the activities of the Alberta Co-operative Credit Societies Act initiated by Geo. Webster of Calgary shows a considerable amount outstanding. Particular attention was called to the loan of \$45,000 to the Donatville Society consisting of 25 Hungarians. They had bought land, completed the estate, at excessive prices and all but 7 had been forced to quit. The government hopes to recover from the man who put over the deal. A supervisor at \$4,300 will replace the man at \$2,000 a year who did all the lending.

Red Thursday was duly observed in Edmonton by a Communist march on the Legislative Building. Gathering at the north entrance of the building they were prevented from entering by the police. After the inflammatory speeches in English and Russian they departed. So quiet was the demonstration that the members in the Legislative Chamber at the South end of the building were unaware of the disturbance. It was not till the parade had moved off that the Labor members came running down the main staircase, just too late.

A conference between government and municipalities will be held to consider extending Mothers' Allowances to mothers whose husbands are sick. These men suffering from T. B. may get a chance to recover. The mover, F. J. White estimated the cost at \$70,000 a year.

ONE GOOD DISH MAKES A COOK FAMOUS
If you are a business or professional woman there are lots of times when you would like to ask a few people to join you at supper time, but you decide the time necessary to arrange a meal is too great and you would be too tired at the end of the day. Or if you have a home and do not keep a maid you are rather timid about inviting guests to your home. But remember this: the guest who gives a thought to criticism is a veritable Scrooge suffering from T. B. is hardly likely any of your friends are in that category.

It is delightful to find an occasional recipe which may be wholly prepared the day before so that you can just slip it into the oven and give your undivided attention to the other last minute things. And this dish is truly appetizing and delicious. Try it.

Casserole of Ham and Vegetables
1 cupful of drained peas; 2 cupfuls diced cooked ham; 1-2 cupfuls scalded milk; 1 cupful soft bread crumbs; 1-4 cupful melted butter; 2 pinches chopped; 1 tablespoon chopped parsley; 1-2 tablespoons chopped onion; and one cupful of Canadian cheddar, grated; 1-8 teaspoon salt; 1-8 teaspoon onion powder; dash of paprika and three eggs.

Pour scalding milk over bread crumbs. Add butter, pimiento, onion, parsley, grated cheese, and seasonings. Add well beaten eggs. Put ham and peas in a buttered casserole and put the milk and cheese mixture over them. Bake about fifty minutes at 350 degrees F.

GAS COMPANY TO DRILL THREE WELLS

(From The Viking News)
Doubling of the main transmission line for nine miles and drilling of three more wells in the Viking field are among the principal items on a \$425,000 program of expenditures by the Northwestern Utilities, Limited, during this year, according to Julian Garrett, manager for the company.

The main gas line, which was doubled for some 20 miles last year from the Viking to Holden with 12 3-4 inch piping, is to be doubled from Holden to Ryley at a cost of \$130,000. This will be done by the company itself which proposes to start work on July 1st. Operations will be under the supervision of C. H. Spencer, superintendent of the company, and will last around a month.

When this work is completed, the company will be in a position to reduce its maximum field pressure for peak load purposes next winter from 350 to 325 pounds per square inch. The pressure at the Edmonton end will not be affected, however, remaining at 100 pounds as formerly. The reduction in pressure at the Viking end, however, is another step in relieving the strain on the main line should it be necessary to carry it to the maximum pressure.

With regard to the new wells, the company intends to have drilling start just as early as spring weather conditions permit. The rigs for two wells were placed on the ground last fall so things can be made ready in short order for the drilling operations.

It is estimated that the cost of drilling these three wells will be \$84,000, while there will be \$3,000 of additional cost for field lines. At present the company has an open flow capacity of 80,000,000 cubic feet of gas per day, having 16 of its own wells and two that were drilled by the Hudson's Bay-Marland Oil company.

The budget provides for \$61,000 on distribution expenses while there's \$33,000 down for various extensions to the distribution system. For geological exploratory work the company estimates an expenditure of \$50,000.

HOW TO BUILD A COLONY UP FOR THE HARVEST

To gather a maximum crop of honey the colony must be exceedingly strong in bees at the same time as the major honey plants commence to secrete nectar. Furthermore, the majority of these bees must be of the right age to become gatherers at this particular time and to be of the right age they must be produced during the eight weeks just prior to the honey harvest, which means during the spring and early summer. The spring is the most critical period of the year for the beekeeper because it is during this period that his colonies are usually at the weakest in bees, the bees lowest in vitality, short of stores, and at the same time are required to produce the largest amount of brood. Young bees cannot be produced in large numbers without (1) a good prolific queen to produce the eggs, (2) a plentiful supply of food to feed the oncoming generation, (3) sufficient room for the queen to reach her maximum egg production, (4) adequate protection, especially from cold winds and (5) a force of bees strong enough to care for all the brood the queen can produce, it is up to the beekeeper then to see that these essentials are supplied. As soon as possible in the spring look over the colonies and replace all old and useless queens, supply each colony with enough food either in the form of honey or syrup and see that there is sufficient room for the normal expansion of the brood nest. Bees wintered outside will have protection enough but those wintered in cellars should have at least protection from the wind when they are moved to their summer stands. All colonies that are weak in bees should be united or have a two pound package of bees added to them. Remember that every check in the spring brood rearing will mean less bees for the harvest.

For further particulars, write for Experimental Farms Bulletin No. 33, New Series.—C. B. Gooderham, Dominion Apiarist.

It pays to read advertising messages in this paper, week by week, they contain store news, and information of much value—offerings of bargain buys which mean money saved to the careful shopper! Incidentally, it is mighty poor economy to be without the local paper—it's advertising news alone will, in the course of a year, more than repay in dollars and cents the price of the annual subscription.

M.D. BATTLE RIVER COUNCIL MINUTES

Meeting of the council of the Municipality of Battle River No. 423, met in the Municipal office at Irma on March 13th, with Messrs. Smallwood, Burton, Vesey, Burrell and Challies present. Same were called to order and nominations for reeve asked for.

Moved by Mr. Vesey that W. A. Burton be appointed reeve for the ensuing year. Cd.

Moved by Mr. Smallwood that Mr. Challies be appointed deputy reeve for the first six months. Cd.

Moved by Mr. Smallwood that the discussion re the Secretary-treasurer be closed. Cd.

Moved by Mr. Smallwood that R. W. Hay be appointed auditor for 1930 and that the Reeve or secretary communicate with him as to the acceptance of such office. Cd.

The minutes of February 11th were read.

Moved by Mr. Smallwood that same be accepted as read. Cd.

Moved by Mr. Burrell that Messrs. Burton and Smallwood be appointed as a cemetery committee. Cd.

Moved by Mr. Smallwood that Messrs. Burton and Challies be appointed as a sick committee. Cd.

Moved by Mr. Burrell that Mr. Vesey be added to the sick committee. Cd.

Moved by Mr. Smallwood that Mr. Challies act in conjunction with the Reeve as the Finance committee. Cd.

Moved by Mr. Burton that Mr. Smallwood be appointed as a committee to investigate damage claims re ponds. Cd.

Moved by Mr. Smallwood that Mr. Vesey be added to the committee re ponds. Cd.

Moved by Mr. Smallwood that the Reeve and Secretary Treasurer be authorized to make arrangements with the Bank of Montreal at Irma for a credit of \$5000.00 for municipal purposes, \$10,000.00 for school purposes and \$2500.00 for hospital purposes. Cd.

Moved by Mr. Challies that Mr. Smallwood and the Reeve be appointed as a delegation to interview the Minister of Municipal Affairs.

Moved by Mr. Purvis at Edmonton regarding all seed grain indebtedness of this municipality. Cd.

Moved by Mr. Burrell that the Reeve and Treasurer sign Bank form L. F. 22, Bank of Montreal at Irma regarding signatures of Reeve and Treasurer. Cd.

Moved by Mr. Burrell that, where as the Council deem necessary to borrow the sum of One Thousand Dollars (\$1000.00) to meet current expenditures for municipal purposes, the Reeve and Treasurer are hereby authorized on behalf of the Council to execute a note in favor of the Bank of Montreal, Irma, for the amount of the said one thousand dollars. Cd.

Letter read from the Old Age pension department re Mary McPhee.

Moved by Mr. Smallwood that the Reeve be appointed as a committee to investigate the claim of residence of Mary McPhee in the next meeting. Cd.

Moved by Mr. Vesey that the report of the Inspectors of Mother's allowance re Mrs. O. G. Reed be accepted. Cd.

Moved by Mr. Vesey that the application of Mrs. O. G. Reed for Mothers Allowance under the said Act be accepted and that the Council be instructed to pay the amount of \$30.00 per month be paid her and that this Municipality pay one-half of this \$30.00 per month. Cd.

Correspondence read re the Hudsons Bay Co. and Lamberts team of horses impounded.

Moved by Mr. Smallwood that the Secretary be instructed to write the Hudsons Bay Co. at Vermilion to the effect that the damages awarded are not as large as the mount first claimed and that a rebate of \$4.00 from the amount of their cheque will be refunded them on receipt of the \$10.20 pound funds due to pound keeper R. Headon of Fabyan.

Mr. Vesey moved an amendment to the motion of Mr. Smallwood that that part of his motion rearing a rebate of \$4.00 will be refunded, shall read a rebate of \$6.00 will be refunded. Amendment lost; motion carried.

Letter read from the Soldier Settlement Board re the S.W. 27-44-8-w 4th. Secretary was instructed to reply to Mr. Deans letter drawing his attention to the Seizers made by this Municipality in 1925 and his assurance that if this Municipality would release these seizers that the board would pay the taxes on the land leased to others than Soldiers Settlers.

Moved by Mr. Burrell that the delegation on Seed Grain while in Edmonton interview the Dist. Supt. of the S.S. Board and Mr. Deans re payment of taxes on revenue producing lands and that the delegation take all

THE Bank of Montreal offers you a helping hand in your steps toward financial independence. It welcomes small savings deposits, pays compound interest on them, and gives to you the security afforded by its great resources.

correspondence with them. Cd.

By-Law No. 28 for the imposition of a Business Tax in this Municipal District read.

Moved by Mr. Smallwood that By-law No. 28 pass its first reading. Cd.

Moved by Mr. Vesey that By-law No. 28 pass its second reading. Cd.

Moved by Mr. Challis that By-law No. 28 pass its third and final reading. Cd.

Moved by Mr. Challis that By-law No. 29 for the purpose of a temporary road through the S. E. 35-45-7-w 4th and payment therefore be tabled until next meeting. Cd.

By-law No. 30 for the purpose of a grant to the Doctor's Guarantee and payment therefore, read.

Moved by Mr. Smallwood that By-law No. 30 pass its first reading. Cd.

Moved by Mr. Burrell that By-law No. 30 pass its second reading. Cd.

Letter read from the Dept. of Immigration and Colonization re Seed and Feed.

Moved by Mr. Smallwood that this Municipality will not consider the advancing of Seed Grain or Feed to any person in this Municipality during the year 1930. Cd.

Moved by Mr. Vesey that this Council authorize the cancellation of a portion of road on plan No. 7919 re the S.E. 26-45-9-w 4th and that the Secretary be instructed to get the plan of the Irma Cemetery registered in the proper Land Titles office. Cd.

Moved by Mr. Vesey that this Council accept the requisition of the Wainwright Hospital Board for the amount of \$1602.65 for the year 1930. Carried.

Moved by Mr. Smallwood that the rate for Hospital purposes be 2 3-4 mills for 1930. Cd.

Moved by Mr. Burrell that the next meeting of the Council will be held at Irma, Alberta, on Tuesday, April 8th, 1930 at 10 o'clock A.M. Cd.

Moved by Mr. Smallwood that the Secretary file a Caveat against the S. E. 16-45-8-w 4th for the amount of \$475.00 for Hospital Fees, Medical Fees and Funeral Expenses occurred by the late Neil James McGillis and same to be done at once. Cd.

Moved by Mr. Smallwood that the Bank book, watch chain and locket and a bunch of 4 keys belonging to the late N. J. McGillis be kept in the Municipal safe for safe keeping until same are redeemed by the proper authorities. Cd.

Moved by Mr. Challies that the following bill be passed and paid, re N. J. McGillis:

McAthey & Jones—Ambulance \$2.00
Irma Dray, etc.—Fun. Services 4.00
E. Sharkey—Digging grave 12.00
M. D. Battle River—Cemetery Plot & Telephone Calls 11.00
J. C. Hennessy—Casket Shroud and Services 155.00
Dr. Little—Professional Services 52.00
Viking Mun. Hos. No. 10—Hospital fees 155.00
Dr. Greenberg—Professional Services 38.00
C. G. Purvis — Disbursements re McGillis 18.65
Also that the following accounts be paid:
R. D. Smallwood—Coun. mtgs and mileage \$17.00
R. J. Tate—Secretary Dec., Feb., and March \$400.00
W. H. Brink—Labor Div. 6 10.00
Dr. Greenberg—M.H.O. 4.00
Irma Times—Papers, Feb., 24.00
Alta. Gov. Tel. 3.55
Calgary Power Co.—Elec. Light 3.30
West. Mun. News—Stationery 6.95
S. Merrick, Returning Officer—Election Councilors 35.00
F. Seabrook, D.R.O. Div. 1 5.00
H. Carter, D.R.O. Div. 4 5.00
Motion carried.

Moved by Mr. Smallwood that this Council continue the contract they have with the Irma Times as to advertising and circulation of this paper in this Municipality. Cd.

Moved by Mr. Burrell that the Secretary get an estimate on the cost of building shelves for records in the Municipal Office. Cd.

Moved by Mr. Smallwood that this Council adjourn. Cd.

NO 1930 ELECTION IN ALBERTA

There won't be a general provincial election this year.

At any rate, all signs point that way, and political dopsters say that an election isn't in the least bit likely.

The Natural Resources bill provides that the provincial treasurer—and that's Hon. J. E. Brownlee—will act as a minister of resources for the time being. This means that Mr. Brownlee will be empowered to conduct all the final negotiations for the transfer of the resources, and that there isn't the slightest need of hurrying on an election merely to find a seat for the new cabinet minister.

And Mr. Brownlee himself, talking with newspapermen on Friday, smilingly hinted that the government had enough on its hands, without bringing on an election this year.

KIDNEY TROUBLE BACKACHE VANISHED

"This magic," says Mr. A. Chagnon, "thousands with kidney and bladder trouble, constipation, indigestion, gas, backache and overworked with 'Tad's' Pills. Nerve quiet, blood sleep at once. Get 'Tad's' Pills from drug dealer today."

WORLD HAPPENINGS BRIEFLY TOLD

Moscow authorities have decreed that all restaurants in the city should have nine mealless days each month, it being hoped thus to save both meat and fuel.

The giant British dirigible, R-100, is undergoing tests with the possibility that she may make a flight to Canada towards the end of April or the beginning of May.

Aeroplane service carrying passengers between St. Paul, Minn., and Winnipeg was inaugurated February 17. The passenger service will be operated over the week-ends only.

Canadian silver fox pelts are finding a ready market in Great Britain, it is stated by Lt.-Col. D. A. MacKinnon, D.S.O., of Charlottetown, P.E.I., one of Canada's principal silver fox breeders.

Orphaned by an air crash in Texas, recently, in which his father and mother were both killed, 16-month-old Robert Gray, Jr., must return 10,000 miles to New Zealand because of United States immigration laws.

Only 2,400 Belgians were taxed on incomes of more than \$7,000, according to figures just published. There are 9,300 people with incomes ranging from \$3,000 to \$7,000, while 3,487,700 had incomes of less than \$750 a year.

Madame Louise Kirby Lunn, former British courtier, is dead, after a long illness. She sang at the Covent Garden opera house in London, England, at the Metropolitan opera house in New York, and in Budapest, Hungary, and Germany.

"I believe Canada, before many years, will be the first of the Dominions to evolve into a great manufacturing country," declared the Right Hon. Stanley Baldwin, ex-premier and chief of the Conservative opposition, at his final speech in Belfast.

With the intention of securing the same control over real estate dealers and their transactions as they now enjoy in respect of stockbrokers, the Ontario Government, at the present session, will introduce new legislation to prevent frauds against the public.

Will Try New Process

Canada To Experiment With Freezing Fish In Transit

Experiments in the freezing of fish in transit by the silica jelly process will be conducted by the Department of Fisheries early this summer, it was learned at Ottawa. It has been found in the United States that this method of refrigeration is eminently satisfactory in the transportation of pre-chilled fish, but the Canadian Department desire to go a step further and ascertain if it is equally as effective for fish that has not been pre-chilled.

Should the experiments prove successful it would mean a saving of about 12½ per cent. in refrigeration space, with a consequent increase in that proportion in the packing of fish cargoes by rail.

Means Plenty Of Work

Recording Australia's Rainfall Is Considered Quite a Task

Australia has an area of 3,000,000 square miles, and the task of recording the rainfall is one of considerable magnitude. Throughout the continent there are no less than 6,000 rain gauges, 900 of which are operated by private citizens, who are all unpaid weather observers. In some parts of Australia the observers have a busy time in the rainy season. In eastern Queensland early this year as much as 10 inches of rain were recorded in 24 hours.

Steward (to sea-sick passenger): "Feel like a cup of tea, sir?" Passenger: "Do I look like a cup of tea you idiot?"

Aching Feet

Stop aching when bathed in a solution of Minard's and warm water. Leaves smooth and rested feeling.

Of Historic Interest

Some Inscriptions Which Cannot Be Classified As Vandalism

"Vandalism!" exclaim most people when anyone defaces a monument or stone or tree with any sort of inscription. Of course, the comment is usually justified, but there are exceptions. Such scribbled remarks by "vandals" who lived 2,000 years ago or more have often shed light on the ways of ancient inscriptions. And there are some modern inscriptions of this kind which may prove interesting to the archaeologists of the future. Certainly the "writings" prove that human nature has not altered much through the centuries. Among some of them left on the columns of an ancient Egyptian altar, at Sagara, by Australian troops who served in the war, is the following: "I am the only survivor of my company which fought in Gallipoli, John Smith, Melbourne, 1917." An Egyptian hieroglyphic recently uncovered is worded in almost the same way: "I am the only survivor of my company which fought in Punt, and I have come to worship at the temple of my fathers." The Egyptian soldier who signed it lived over 3,000 years ago.

Subsidies For Air Transport Urged

Would Put Passenger Rates On Par With Railway

Subsidies for aerial passenger transport line were urged by Major General J. H. MacBrien, president of the Aviation League of Canada, in a speech at Montreal. In Europe, where such subsidies are paid, aerial passenger rates were on a par with railway rates whereas in Canada the air rates are three times as great as those offered by railroads.

For this reason the passenger branch of air transport was not progressing. General MacBrien urged the formation of a branch of aviation to be known as aerial service in which all companies would co-operate to eliminate wasteful competition and work for greater development of the industry.

Busy Construction Season

Saskatchewan Awarded Largest Number Of Contracts During Year 1929

The Saskatchewan Western Producer notes that, "with a total of 2,327, Saskatchewan took the lead among the four western provinces for the number of construction contracts awarded during the year 1929, according to figures reported to the Saskatchewan Department of Railways, Labor and Industries. This compares with British Columbia's 2,275, Alberta's 2,055, and Manitoba's 1,658. The value of the permits in the province was \$34,184,300, or an increase of \$14,000,000 over the 1928 total."

(By Annebelle Worthington)

WHAT LENGTH SKIRT?

It all depends on the style. In evening wear, dresses are quite long, and to the ankle. But where the style dips in the back, the front hem may be considerably higher.

Afternoon dresses are from three to six inches below the knee, depending on the type of rock whereas sports dresses are but slightly longer than last year.

In this important detail, as well as many others, it would be best for you to follow an authoritative guide. We recommend our New Spring Fashion Magazine which shows the latest styles of styles, the new lines and length, new fabrics, etc. Send 10 cents for your copy, addressing Fashion Dept. (insert name of newspaper here and regular pattern department address).

WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unsightly blotches on the face, eyes with yellow tinge and that tired and languid feeling? This indicates a torpid liver. Headache, Dizziness and Biliousness surely follow. You must stimulate your lazy liver, start the bile flowing with Carter's Little Liver Pills. They also act as a mild laxative, purely vegetable, free from calomel and poisonous drugs, small, easy to swallow, and not habit forming. They are not a purgative that cramps or pains, unpleasant after effect following. On the contrary a good tonic. All Druggists 25c and 75c red pkg.

Grain Estimates Sound

Says Every Bushel Of Wheat Now In Storage Will Be Needed Before New Crop Harvested

E. J. Garland, M.P., for Bow River, Alberta, declared in an address given at Stratford, Ont., that the Argentine wheat crop is not the only factor contributing to the present condition of the wheat market. Speculation in grain is one of the biggest factors, he declared, and he envisioned the day when the League of Nations will be called upon to deal with short selling in food commodities.

Canada has positively no need to be alarmed at present, he said, because there was nothing to be alarmed about. The wheat pool in the west knew what it was doing and every pound of Canadian wheat now in storage would be needed before this year's crop is harvested, he declared.

If the wheat stored now were sold at the present prices it would bring two hundred million dollars less than last year, he stated. "That would mean, in effect, two hundred million dollars less purchasing power. For every cent wheat rises in price it will mean two and a half million dollars added to the purchasing power of Canada next year."

"The transportation companies," he added, "have nothing to worry about because they will get the grain when it begins to move."

Recipes For This Week

(By Betty Barclay)

"LEMON-NAISEE" RECIPE

(Makes about 1 quart)

2 egg yolks.

1 teaspoon salt.

¼ cup lemon juice.

1 quart salad oil.

Break the egg into a bowl. Add salt and stir well. Add half of the lemon juice and mix well. Add oil, slowly at first until ¼ cup is added; then the oil may be beaten in rapidly. When the dressing becomes thick add the remainder lemon juice and proceed with remainder of oil.

This dressing may be varied for different salads. For a sharper dressing, add ½ extra cup of lemon juice just before serving. This makes a thin dressing.

For a meat salad, add 2 teaspoons dry mustard. For a fruit salad add ½ cup whipped cream and ¼ tablespoon lemon juice to 1 cup mayonnaise.

ORANGE JELLY

6 oranges.

3 lemons.

Cold water.

Sugar.

Cut oranges and lemons in very thin slices, discarding seeds. Measure and for each cup allow three cups water. Bring to boiling point and boil one hour. Let drain in jelly-bag overnight. Measure juice and for each cup add one cup sugar. Boil until a little dropped on a cold saucer forms a jelly-like clot. Turn into sterilized jars and when cold cover with paraffin.

Saskatchewan Dairy Association.

1929 Was Generally a Good Year In Dairy Industry

In his presidential address to the Saskatchewan Dairy Association, B. F. Grumdeen, of Estevan stated that 1929 had been, generally, a good year in the dairy industry, large increases in production being reported practically throughout the whole year. The value of the dairy products was more than \$1,000,000 above that of the year before.

Claim Tree Is Tamed

An oak tree, 1,000 years old, near the village of Noebentitz, is claimed to be the tomb of the famed German poet and statesman, Hans von Thummler. The tree had a large hollow in its trunk and in this hollow, back in 1924, Thummler is supposed to have been interred. The cavity has been filled up with concrete.

There's nothing you can do to defend yourself when a bandit says, "Throw up your hands," or when a grocer says, "Eggs are eighty cents."

Guarded By Invisible Ray

Money and Valuables Can Be Protected By a New Scientific Device

A fifty-dollar bill guarded by an invisible ray, was offered to any person who can pick up the money without making the ray sound the alarm.

The ray was set up at a meeting of the New York Illuminating Engineering Society in the Westinghouse Lighting Institute by James L. McCoy, research engineer of the Westinghouse Lamp Company. It was announced that the money would remain indefinitely behind the ray awaiting all comers, or until someone solves the scientific riddle.

The bill was put in a five-foot safe with the door closed, but unlocked. Somewhere athwart the safe, probably across the door, an ultra-violet ray is placed. It is harmless. It cannot be felt by human touch. It is invisible either in darkness or light. It "chimes" so to speak, upon a photo-electric eye some distance away. Anyone attempting to pick up the bill interrupts the ray, thereby casting the unseen "shadow" upon the mechanical eye. Thereupon the eye loudly goes "bing," ringing a burglar alarm.

"With these rays," said Mr. McCoy, "it will be possible for jewelers, bankers and other custodians to add greatly to the security of their valuables. It can be made impossible for an intruder to move about without detection, as the rays can be placed at various angles in a room. They may operate a tear gas barrage, or set off a silent alarm. They can be projected far enough to protect the entire room of a harbor in wartime with warning signal bell."

Name Is Exclusive

Ontario Has Only "Brookville" In The World

A gentleman once stepped into a post office in London, England, to which the cable office is attached, and wrote in his best hand "Brookville, Canada." A pair of twinkling eyes looked up at the chap, and the young lady deliberately scratched out the word "Canada." She inquired if the gentleman lived in Brookville. The answer was "Yes," and she said, "Well, have you never heard that there is no other Brookville in the world but the one in which you live, and no matter how hard we tried, this message could not be sent to any place but your own town?"

A Nations Prosperity

The keynote to prosperity is simply this—that prosperity is only regarded as prosperity if it is shared by the whole of the people. A nation is not prosperous if its workers cannot buy the goods they themselves produce, if profits merely go into the pockets of a few privileged men.

Manitoba Honey

Manitoba produced 6,899,399 lbs. of honey last year, 15 individual operators each produced a can and more. Manitoba exhibitors secured three first places out of four classes entered at the Royal Agricultural Fair, at Toronto.

Iceland Good Customer

For Other Countries

Ahead Of All Nations In Purchases Per Head Of Population

No country in the world buys more, per head of population, in foreign countries, than Iceland.

The people who think that Iceland is nothing more than a skating-rink by nature, we learn from the London Daily Telegraph, will be surprised to know that it is the best customer exporters have in other countries. What is more, says Howard Little, in this London newspaper, although Iceland is compelled to make relatively enormous purchases, the annual credit balance stands high, and shows a tendency to increase. Mr. Little continues:

"Iceland has modernized herself rapidly, in spite of difficulties, natural and imposed. Neither iron, timber, building stone, cement, coal, nor salt, are produced within her own borders. All these essentials must be brought overseas, and possibly hauled many miles into the interior over hard ground, where there is at present no road."

"In 1889, when I first visited Iceland, the capital, Reykjavik, was a town of some three thousand inhabitants, and boasted neither harbor nor roads. Nothing went on wheels. Today Reykjavik has a fine harbor, the construction of which was actually commenced in 1913, interrupted by the war, and because of the necessity of continued enlargement, is in part not yet completed. The inhabitants of the town number 26,000, and there are some 500 motor vehicles, all of which are kept particularly busy. The main roads have a good surface, and other roads within and leading from the capital are also being improved."

Iceland's Parliament House, University and Museum, it is then related, are in many important respects models of what these institutions should be. Indeed the claim is made, and with some show of reason, we are advised, that Iceland's Althing is, in reality, the "Mother of Parliaments." The thousandth anniversary of the first meeting of the Althing, which was celebrated next June, and this informant adds:

"Fifty-four years ago Iceland was left in a condition of poverty and without business experience. Her people, by their own unaided efforts have brought about many remarkable changes. Moreover, this has been done in spite of natural disadvantages, and in face of something worse than mere indifference from the outside world—that world which the people of Iceland have actually led in the discovery of new lands and in the founding of self-supporting colonies."—Literary Digest.

Had Time To Grow

Deliberate Old Lady (who has been taking a lot of time in selecting her purchase): "But I don't think this is lamb. It looks to me like mutton."

Exasperated Butcher: "It was lamb when I first showed it to you, ma'am."

The Trans-Andine Railway tunnel of South America is five miles long. It is 10,486 feet above sea level.

NO MORE ECZEMA

Itching Ends in 1 Minute

"Had suffered for months. Single application of 'Eczema-Salve' ended itch and burn in 1 minute. I lost sleep, lost appetite, lost weight. 'Eczema-Salve' ends Eczema quickstarters ever known. Itching stops instantly. All druggists."

Some Figures About Canada

Few Grasp Vastness Of Britain's Largest Overseas Dominion

Canada is Britain's largest overseas Dominion; bounded by three oceans. Coastal distances (per Canada Year Book): Pacific Coast line, 7,180 miles; Hudson Bay coast line mainland, 6,000 miles; Atlantic coast line, 5,000 miles—Total 18,180 miles. Canada's greatest width in due east and west direction approximately 3,550 miles; greatest distance between southern and known northern land extremities, approximately 2,870 miles. Canada-United States boundary, 3,985 miles long; 1,787 miles by land, 2,197 through water. Canada is larger in area than United States with Alaska by 42,912,000 acres.

Largest Elevator At Any Seaport

Manmohr Alberta Wheat Pool Elevator In Operation At Vancouver

The largest terminal grain elevator at any port on the seven seas has recently been put into operation at Vancouver by the Alberta Wheat Pool. This elevator has a capacity of 5,100,000 bushels and is known as Vancouver Pool Terminal No. 1.

The port of Vancouver is now an important grain shipping centre. During the crop year ended July 31, 1929, shipments of grain totalled 96,138,218 bushels compared with 79,714,512 bushels for the year ended July 31, 1928, and 34,415,653 bushels for the 1926-27 crop year.

Some Brilliant Ideas

Even the newspapers are unable to reach 100 per cent. of the university students who are burning the midnight oil in quest of higher learning. In reply to a recent examination question regarding General Smuts, several students in one university said it was a disease attacking wheat, while one bright scholar confided that General Smuts were "stories that one should not tell."

Among gypsies, children born on Christmas Day are said to have the power of divination and ability to avert the "evil eye."

A device for removing ashes direct from houses is used in New York City.

Make Your Windows Pay

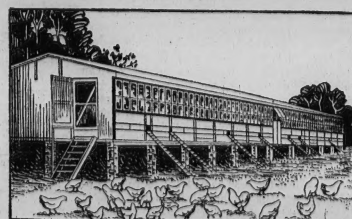

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES, LAYING PENS, DAIRY BARN, SUNROOMS, ETC.

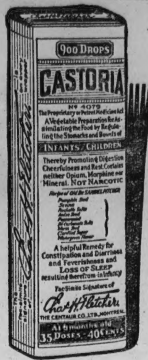

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

An Ailing Child

Are you prepared to render first aid and quick comfort the moment your youngster has an upset of any sort? Could you do the right thing—immediately—though the emergency came without warning—perhaps tonight? Castoria is a mother's standby at such times. There is nothing like it in emergencies, and nothing better for everyday use. For a sudden attack of colic, or the gentle relief of constipation; to allay a feverish condition, or to soothe a fretful baby that can't sleep. This pure vegetable preparation is always ready to ease an ailing youngster. It is just as

harmless as the recipe on the wrapper reads. If you see Chas. H. Fletcher's signature, it is genuine Castoria. It is harmless to the smallest infant; doctors will tell you so. You can tell from the recipe on the wrapper how mild it is, and how good for little systems. But continue with Castoria until a child is grown.

replied the young man impulsively. "I'll sleep in the attic, if only you'll take me in."

"Well," chuckled Grandma, "the attic's clean, anyway! I told you she'd cleaned everything. You take him up attic, dearie, and show him how pretty it is from the south window. There isn't a nicer view in all Wickfield. But I don't think, young man, that the room over the kitchen is good enough for a guest. However, you can take your choice; and as Charman says, it's easy to heat come winter."

As the young people left the room, the old doctor drew his chair closer to Grandma's.

"Well?" he questioned. "How does the boy strike you, Polly?"

"Dear me," sighed Grandma, a pleased light brightening her eyes, "I don't believe anybody's called me Polly in twenty years. As for that boy, Edward, I like him. He's got manners—not that 'manners' are everything, but they cover a multitude of sins. And he looks you straight in the eye. If his eyes had been shifty I'd never have consented to take him in. But almost the best thing about him is his legs. He walks like a soldier."

"Yes," laughed the doctor, "his legs seem to be all right; though I wish he were ten pounds heavier."

"We'll have to fat him up," commented Grandma. "His being here will make more work for Charman, but she says she can stand it. Say, Edward" (lowering her voice), "have you seen that high-flyer that Jim Bennett took to the church social?"

The doctor laughed again; but his reply was interrupted by the opening door, and a small boy entered hurriedly.

"It's Jamie Oldham," said Grandma. "You tell your mother that her yarn hasn't come yet; or were you wanting something else?"

"I want the doctor," panted the little boy. "The baby's got an awful stomach ache and Mummy sent the automobile and sent me running. She said to tell you the baby's black in the face already, and for you to hurry."

"Like as not, Susy Oldham's been feeding it mince pie," commented Grandma, as the doctor hurried away.

"It's a wonder she's raised any of her children. I suppose Edward will come back for that young man soon as he's turned the baby upside down and given Susy a good talking. I wonder which room the boy will take. He doesn't seem polite, somehow, to put him in the ell."

"The boy" was standing in the ell at that very moment, exclaiming at the beauty of a big four-poster bed.

"Yes, it's wonderful," said Charman, touching the carved posts lovingly. "My great-grandfather slept on it. Later it was put in the guest room, and when black walnut came into fashion it was banished to the servants' quarters."

"Delightful quarters for the humble," smiled the young man. "I think I'll choose this room if it's as convenient for you."

"It will be more convenient. It's smaller to care for, and easier to sweep because of the hardwood floor. That Turkish carpet in the east room is gorgeous, but it's a sight of work to clean."

"Look here!" said the doctor suddenly. "I won't have you cleaning for me. I'll have time enough at first, anyway, to take care of my own domain. I'm a dandy sweeper, and can make a bed as expertly as a trained nurse. Just try me!"

Charman laughed.

"What would Grandma say? She thinks it's right to let even offer you this room where she used to keep her hired girl. But I think it's a lovely room with its quaint dormers. Just see the view from this window. Isn't the river adorable from here? When I was a little girl I used to pretend it was a silver ribbon, put there by the fairies. I remember conning my fancy to Jimmy Bennett, and he

"Hush!" laughed the old man. "Would you discourage him at the very start?"

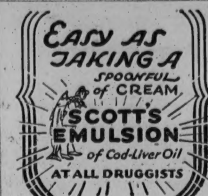

"I'm only warning him," said Grandma. "Wickfield folks are set in their ways, and you're one of 'em, Edward; if I do say it to your face. Maybe you'll think it's disrespectful, my calling the doctor by his first name," she added to the younger man, "but we grew up together here in Wickfield, and I'm not much older than he is though he's caught the habit of saying Grandma like the rest of them. Here's Charman now. She's seen the automobile and is hurrying. That blue gingham gets pretty on her, doesn't it? She made it herself. Come in, dearie. Here's the doctor and his young man."

"Yes, the blue gingham certainly 'set pretty on her.' This was the prospective boarder's thought as he arose, feasting his eyes on the vision in the doorway. The old doctor was feasting his, as well; and Grandma Davis might have been said to do the same. For Charman made an astonishingly pretty picture, her cheeks flushed from hurrying, her blue eyes shining, a bit of not unnatural embarrassment making her pause a moment before coming forth.

"Charman," said the doctor, putting a fatherly arm across her shoulders to draw her nearer, "th's is the boy who's promised to help me live. If you'll find him a place to live, I knew his father and his grandfather before him, and will vouch for the fact that he won't run off with the Davis candlesticks!"

Charman laughed as she stretched out a friendly hand which the young doctor took, and forgot to return till the girl drew it away. She said, a smile bringing out the dimples of which her mother had been so proud: "He might not think them worth the bother! They're brass, not silver, Doctor Carter. Would you like to go up now and see the rooms? The east room is larger; but the one in the ell looks toward the river and is very cozy."

"I really needn't look at anything,"

laughed, I didn't forgive him for years and years!"

"No wonder!" responded John Carter, with instant understanding. "Who is he? I'd like to smash his face for you!"

"You needn't bother," laughed Charman. "In fact, I wouldn't have hurt him for worlds. Jim is the rising young man of our community, as you will see from Canada. At present is setting the town agog by running after a green hat."

(To Be Continued.)

Adds To Reputation

ASTONISHING Discovery Has Been Made By Canadian Astronomer

Dr. J. S. Plaskett, director of the astrophysical observatory, near Victoria, one of the world's most eminent astronomers, has added to the reputation of Canadian science and to his own fame by an astounding discovery concerning the movement of the world, the sun and all the heavenly bodies visible to mankind. For this achievement the Royal Astronomical Society has awarded to him its coveted gold medal, which never before has come to Canada.

Dr. Plaskett's newest discovery has been translated into unscientific language to mean that every star with the vision of the most powerful telescope and every other body for billions of miles beyond them, is rotating about a centre inconceivably far from the earth.

The motions of the speck of matter known as our world thus are discovered to be far more complicated than has usually been supposed, although the theory now proven by Dr. Plaskett has been suggested as possible before. First, it is explained, the world rotates on its own axis in a motion which gives us night and day. This motion is at the rate of 28,000 miles in twenty-four hours. The world goes around the sun once a year, providing the change in seasons. This tour being conducted at the rate of 68 miles a second. Thirdly, the earth moves with the sun in another circle, this being independent apparently of the great universal movement which Dr. Plaskett has been investigating. Fourthly, as he explains the earth, the sun the moon and every tiny point of light visible to astronomers is travelling in a circle of almost unimagined diameter. Its centre appears to be in the direction of the constellation Sagittarius, and is so far distant that light from there would take 47,000 years to reach the earth.

Travelling at inconceivable speed through space, all the heavenly bodies within man's ken are going over distances which it is difficult for the human mind to comprehend. Dr. Plaskett estimates that it requires 300,000 years for the visible universe to complete its great journey around its distant centre. The movement is at the rate of about 300 kilometers a second, or some 200 miles. This is more than 2,000 times as fast as airplanes travelled in the Schneider Cup races recently when they broke all records for human travel.

Constantinople Is Dead

Even Name Has Been Abolished By Turkish President

Constantinople, the magnificent city of the Byzantine Emperor and Turkish Sultans, has been condemned to death by Kemal Pasha. Not only are the streets no longer repaired and mosques and palaces are slowly crumbling away, but a decree by the President even abolishes the name Constantinople, this being considered too Turkish. Henceforth the Ottoman name Stambul takes precedence.

The example of the Bolsheviks of abandoning Pétrograd, the former splendid capital of Russia, to its fate and concentrating upon Moscow, is followed by Kemal, who has instituted a big building program in Angora, where new parks and avenues are being laid out and where a certain amount of night life is developing, following the opening of several cabarets and night clubs.

If one be troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

Just as we were converted by the open-window campaign our next-door neighbor bought a radio.

Russia Erecting New Mausoleum For Lenin

Elaborate Ceremonies Will Mark Dedication In October

Behind a great wooden fence, in front of Moscow's famous Kremlin, entirely screened from public view, hundreds of Soviet workmen are hammering down the grim wooden tomb in which Vladimir Ilich Lenin, "Father of Bolshevism," has slept during the last six years.

On this site is soon to rise a finer and more enduring mausoleum of granite and malachite to house the frail figure of the great revolutionary leader. While these operations are in progress, the embalmed remains of Lenin have been transferred to a special mortuary chamber in the Kremlin, where the coffin is guarded day and night by armed red soldiers.

On the ceiling, under which Lenin will repose in a large, hermetically sealed glass case, will be an armorial ensign of the Soviet Union. Lenin will be garbed in a simple khaki suit of semi-military cut, as at present, and the full length of his body, bearing the order of the "Red Banner" will be exposed to view.

Construction of the new mausoleum is progressing rapidly. It will be completed by October, 1930, when the thirtieth anniversary of the October, 1917, revolution will be celebrated. The most elaborate ceremonies will mark the dedication.

STORMY WEATHER

HARD ON BABY

The stormy, blustery weather which Canadians experience during February and March is extremely hard on babies and young children. Conditions make it necessary for the mother to keep them confined to the house, whose rooms may be overheated or badly ventilated. The little ones catch cold and their whole system becomes racked. To guard against this a box of Baby's Own Tablets should be kept in the home and an occasional dose given the baby to keep him fit, or if a cold suddenly grips him to restore him to health again and keep him in good condition till the brighter, warmer days come along again.

Baby's Own Tablets are just what the mother needs for her little ones. They are a mild but thorough laxative which regulate the bowels, sweeten the stomach, break up colds and simple fevers; banish constipation and indigestion and make the cutting of teeth easy. The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Back in 1700, the foundations of industrial medicine were laid when a doctor wrote a book of 43 chapters on "Diseases of Artificers and Tradesmen."

Minard's Kills Dandruff.

The Greatest Mystery

According to a western newspaper, the sweet mystery of life is love, but according to a widely held idea the great mystery of life is how many people manage to live up to a Rolls-Royce standard on a flivver income. Boston Transcript.

Needless Suffering

The next time a headache makes you stay at home—

Or some other ache or pain prevents your keeping an engagement—

Remember Aspirin! For there is scarcely any sort of pain it cannot relieve, and relieve promptly.

These tablets give real relief, or millions would not continue to take them. They are quite harmless, or the medical profession would not constantly prescribe them.

Don't be a martyr to unnecessary pain. To colds that might so easily be checked; neuritis, neuralgia; to those pains peculiar to women; or any suffering for which Aspirin is such an effective antidote.

You need not hesitate to take Aspirin. It is safe. It is always the same. It never depresses the heart, so use it as often as needed; but the cause of any pain can be treated only by a doctor.

CHAPTER III.—Continued.

"I thought the room over the kitchen would be easier to heat in winter." The idea! snapped Grandma. "That's where I used to put my hired girl!"

"And it's the most comfortable bedroom in the house," retorted Charman. "I'd have taken it myself long ago, if I hadn't wanted to be nearer to you. But let's not worry over that question. He can decide it himself when the doctor brings him in on Saturday. Perhaps after his inspection he'll have none of us."

"Well, well," Grandma repeated, "I'll be a great change. I don't know as I like the idea—hardly. He may be fussy, and want milk in his tea instead of cream, like Deacon Purdie."

"Let's hope he does," laughed Charman as she moved away. "I'll be that much cheaper feeding him!"

"Hush!" reproved the old lady. "Would you begrudge the poor man a dash of cream?"

It was a sunny Saturday when the doctor's dusty car stopped before the old Davis house. Grandma, peering from the window as usual, drew a breath of relief as she viewed the stranger who stood beside Doctor Howe, and was, evidently, admiring the carved pineapple above the door.

Yes, he was young, she decided, but not too young. He was past the age when he would thoughtlessly track dirt into the house (if a man ever is past that age!), and he wasn't old enough to be set in his ways—no thirty surely. He probably wouldn't notice whether his tea contained milk or cream; and he had fine, straight legs. Grandma had once been wooed by a youth who was slightly knock-kneed, and as she told Charman, after sixty years the remembrance still made her shiver.

"The Davises were all tall and straight," she continued. "That's one reason I took to your grandpa. There wasn't a knock-knee or a bowleg in the family. They walked like soldiers."

"And he does, too," mused the old

IN REMEMBRANCE

Katie McCrimmon Love

Born February 23, 1895 — Passed On March 7, 1930

Our kind thought and heartfelt sympathy has been given us courage and strength to face an unexpected turn in life's journey that leads to our heavenly home.

Her character, her low, her life, like her favor the verse were beautiful, pure and sweet. We who loved her most will cherish to the end of the hall a loving memory of one who passed on as she had lived, without sorrow and without pain.

We cannot mourn her passing on before us for her loving spirit is ever so near us as we face the unfinished tasks she left us to carry on.

We who remain behind must continue the journey. Whether the trail be longer or short it has been made so much easier because she has travelled with us. Her eternal spirit radiating joy and happiness brightens the road as we journey along. Her spirit gives us hope and courage to know that the one thing, and the only thing, that counts in life's earthly journey is, not how long, but how well we travel.

John Russell Love

HER FAVORITE VERSES
Goddess plans the little pure and white, and
We must not fear the close that comes and
Time will reveal their colors of gold.

STRAYED

One bay team branded HB half diamond on left hip, strayed from N.W. 1-4 of Sec. 26-46-8, North East of Irma. Any information leading to the recovery of these two horses will be suitably rewarded. Apply J. Lambert, Hudson's Bay Farm No. 85, Irma or Hudson's Bay Company, Vermilion

Breaking all previous records for handling of Japanese oranges, a special Canadian Pacific Railway train consisting of 22 cars of the Oriental fruit, arrived at Winnipeg recently about 60 hours after leaving the coast, in time for the first Yuletide oranges to be on the market. The whole consignment from the coast consisted of 40 box cars holding a total of 8,250,000 of the Japanese delicacy.

About 2,800,000 fry and 240,000 eyed eggs, a total of 3,040,000 prospective fish, was the record output of the Banff hatchery this past season. The eggs were conveyed with difficulty by pack horse to the Bear Creek Valley watershed of Lake Louise. The fry were widely distributed over western areas.

Statistics show an increase of 1,636 vessel arrivals in the Port of Vancouver for the first nine months of this year above the number for the same period last year. Net tonnage shows an increase of 251,648 tons inward while outward tonnage shows a corresponding increase. Gain in arrivals was made up by 22 more deep-sea vessels; 22 foreign coastwise; and 992 more local coastwise.

Editors representing the leading farm papers of the United States will tour Eastern Canada by special train next summer as result of a joint invitation extended to the American Agricultural Editors' Association at their annual convention recently held at Chicago, by representatives of the Canadian Government and the Canadian Railways. The tour of Canada will last fifteen days and will afford the visiting editors an opportunity to study the agricultural and industrial development of the provinces of Ontario, Quebec, New Brunswick, Prince Edward Island and Nova Scotia.

DR. TORY FAVORS PROTEIN SYSTEM OF WHEAT GRADE

An exhaustive survey of the United States system of paying premiums for high protein wheat, and reflecting the same back to the grower, is recommended by Dr. H. M. Tory, chairman of the national research council, in the report of the inquiry in Europe regarding the feasibility of using protein content as a factor in the grading and marketing of Canadian wheat. The inquiry was conducted in Europe by Dr. Robert Newton, professor of field crops, of the national research council, whose report was tabled in the House of Commons Friday. It is also recommended that further investigation be undertaken of the export demand for high protein wheat in the major importing countries.
